The Benefits of Massage

Bodywork Goes Beyond Relaxation

As you lie on the table under crisp, fresh sheets, hushed music draws you into the moment. The smell of sage fills the air and you hear the gentle sound of massage oil being warmed in your therapist's hands. Once the session gets underway, the daily stressors and aching muscles fade into an oblivious 60 minutes of relief, and all you can comprehend right now is not wanting it to end.

But what if that hour of massage did more for you than just take the pressures of the day away? What if that gentle, Swedish massage helped you combat cancer? What if bodywork helped you recover from a strained hamstring in half the time? What if your sleep,

cultures. Touching is a natural human reaction to pain and stress, and for conveying compassion and support. When you bump your head or have a sore calf, the natural response is to rub it to feel better. The same was true of our earliest ancestors.

Healers throughout time and throughout the world have instinctually and independently developed a wide range of therapeutic techniques using touch. Many are still in use today, and with good reason. We now have scientific proof of the benefits of massage -- benefits ranging from treating chronic diseases and injuries to alleviating the growing tensions of our modern lifestyles. Having a massage does more

Along with easing stress -- the No. 1 cause of disease -- massage has a long list of benefits.

digestion, and mood all improved with massage and bodywork? What if these weren't just "what if's"?

Evidence is showing that the more massage you can allow yourself, the better you'll feel. Here's why:

Massage as a healing tool has been around for thousands of years in many

than just relax your body and mind -- there are specific physiological and psychological changes that occur, and even more so when massage is utilized as a preventative, frequent therapy and not simply mere luxury. Massage not only feels good, but it can cure what ails you.

The Fallout of Stress

Experts estimate that 80 percent to 90 percent of disease is stress-related. Massage and bodywork is there to combat that frightening number by helping us remember what it means to relax. The physical changes massage brings to your body can have a positive effect in many areas of your life. Besides increasing relaxation and decreasing anxiety, massage lowers blood pressure, increases circulation, improves injury recovery, encourages deep sleep, and increases concentration. It reduces fatigue and gives you more energy to handle stressful situations.

Massage is a perfect elixir for good health, but it can also provide an integration of body and mind. By producing a meditative state or heightened awareness of the present moment, massage can provide emotional and spiritual balance, bringing with it true relaxation and peace.

The incredible benefits of massage are doubly powerful if taken in regular "doses." Researchers from the Touch Research Institute (TRI) at the University of Miami, found that recipients of massage can benefit even in small doses (15 minutes of chair massage or a half-hour table session). They also note that receiving bodywork two to three times a week is even more beneficial. While this may not be feasible, it's nice to know that this "medicine" only gets better with frequency.

What It Does

In an age of technical and, at times, impersonal medicine, massage offers a drug-free, non-invasive, and humanistic approach based on the body's natural ability to heal itself. Following is a brief list of the many known, research-based benefits of massage and bodywork:

- Increases circulation, allowing the body to pump more oxygen and nutrients into tissues and vital organs;
- Stimulates the flow of lymph, the body's natural defense system, against toxic invaders. For example, in breast cancer patients, massage has been shown to increase the cells that fight cancer.

Furthermore, increased circulation of blood and lymph systems improves the condition of the body's largest organ -- the skin;

- Relaxes and softens injured and overused muscles;
- Reduces spasms and cramping;
- Increases joint flexibility;
- Reduces recovery time and helps prepare the body for strenuous workouts, reducing subsequent muscle pain of athletes at any level;
- Releases endorphins -- the body's natural painkiller -- and is proving very beneficial in patients with chronic illness, injury, and post-op pain;
- Reduces post-surgery adhesions and edema and can be used to reduce and

realign scar tissue after healing has occurred;

- Improves range-of-motion and decreases discomfort for patients with low back pain;
- Relieves pain for migraine sufferers and decreases the need for medication;
- Provides exercise and stretching for atrophied muscles and reduces shortening of the muscles for those with restricted range of motion;
- Assists with shorter labor for expectant mothers, as well as reduces the need for medication, eases postpartum depression and anxiety, and contributes to a shorter hospital stay.

The benefits of massage are diverse. No matter how great it feels, massage isn't just a luxury; it's a health necessity.

To get the full benefits of massage, take it easy after your session and let it soak in.

Soothe Your Skin's Winter Ailments

Kayla Fioravanti

The drying effects of winter are upon us. Here are some at-home ideas to help soothe your skin through this challenging season.

Cleanse

Put away your foaming gels and soaps and stock up on creamy products. Cleansing creams, lotions, and milks are great winter choices, because they don't contain the harsh, oil-stripping detergents found in most cleansing gels.

Tone

Shelve your astringents and switch to a toner. In the cold months, your skin needs to be soothed and balanced, not dried out further.

Moisturize

Choose heavier creams than you would in summer months. You can even use your heavy eye cream on your lips and face. If your skin itches, the dry air is causing the moisture in the top layer of your skin to evaporate quickly. Slather those areas with extra moisture until you

feel relief, and never be afraid of using pure oils on your skin--a bottle of jojoba or olive oil is great to have on hand.

Exfoliate

Exfoliate twice a week to remove dead skin cells and help your skin absorb the extra moisture you are using. Because central heating systems reduce the amount of sebum our skin secretes, contributing to dryness, exfoliation will free this natural regulating agent. Use a cream-based exfoliant with jojoba beads, so your body can soak up the rich oils.

Hydrate

For a simple in-home hydrotherapy treatment, start your day with a steamy shower. Just as you are finishing, switch the water to cold for about 15 seconds and then back to warm for 15 seconds. Repeat the process for two minutes.

Shower and Bathe with Oils

Did you know you can apply body oil, lotion, or cream during your shower or

bath? The heat and steam help your skin to thoroughly absorb the moisture.

The Art of Aromatherapy

Essential Oils Provide Healing and Balance

Aromatic essential oils extracted from herbs, flowers, resin, wood and roots have long been a source of healing, aiding in relaxation, circulation and wound healing. However, the use of these medicinal oils declined as the modern pharmaceutical industry developed. In 1928, French chemist Rene Maurice Gattefosse revived the use of essential oils and developed the art and science of utilizing naturally extracted aromatic essences from botanicals to balance and harmonize the health of body, mind, and spirit. Gattefosse coined the practice aromatherapy.

Because of aromatherapy's affect on emotional health, many practitioners incorporate this noninvasive treatment into their practices. Dispensers or diffusers filled with aromatic essences

may be used to scent the room, and specific essential oils are used on the client's skin during massage. Because each oil has unique characteristics and benefits, the choice of oil or oils can be customized to the client's needs and emotional state. Whether inhaled or applied topically, aromatherapy requires an understanding of how each essential oil interacts with the body, as well as the mind. Many pure essential oils need to be diluted, as they can cause irritation when applied directly to the skin, and training is necessary to guarantee safe and correct usage.

The emotions listed below can be gently eased by one or a combination of the following essential oils:

Anxiety: bergamot, cedarwood, clary sage, frankincense, lavender, patchouli,

Roman chamomile, rose, sandalwood.

Fatigue, Burnout: basil, ginger, grapefruit, jasmine, lemon, peppermint, rosemary, sandalwood.

Stress: bergamot, frankincense, geranium, lavender, mandarin, neroli, patchouli, Roman chamomile, ylang ylang.

Anger: jasmine, neroli, orange, patchouli, petitgrain, Roman chamomile, rose, vetiver, ylang ylang.
